

Project Design Phase-II

Data Flow Diagram & User Stories

Date	31 October 2022
Team ID	PNT2022TMID33210
Project Name	Project – Banking industries AI
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer	Registration	USN-1	. As a user, I can register for the application by entering my email, password, and confirming my password	I can access my account / dashboard	High	Sprint-1
Customer	Application	USN-2	As a user, I could install the application and use it for applying loan eligibility.	I can get the username and password so that we can access the account.	High	Sprint-1
Customer	Dataset	USN-3	As a user, It is very much help for me to understand about the queries.	I can access the customer queries effectively	High	Sprint-2
Customer	Initialisation	USN-4	As a user, the Bank has to implement the online mode so that the peoples could use it instead of waiting in queue.	I can accept that this will be easy to implement.	High	Sprint-3
Customer	Usages	USN-5	As a user, we could use the application to predict the amount of the loan percentage in advance	I can ensure that this will be very much helpful for the users.	Medium	Sprint-4
